Overview

Indicator Family Name
Clinical Commissioning Group (CCG) Indicators

Indicator Family Codes
CCG

Subject
Domain 5: Treating and caring for people in a safe environment; and protecting them from avoidable harm

Condition / Topic area	Family Code	I Code
Patient Safety	CCG	I00806

Detailed Descriptor
The number of <i>C. difficile</i> infections reported, in people aged 2 and over, per CCG.

Construction

Reporting Frequency
Quarterly – with monthly breakdowns for each CCG.

Data Source
Public Health England (PHE) (formerly Health Protection Agency (HPA) until April 2013.)

Calculation Methodology

Introduction

The indicator is a count of the number of *C. difficile* infections reported, in people aged 2 and over, per CCG.

Data Fields

The data fields supplied from HPA/PHE are as follows. Details of the current PHE mandatory surveillance are available at this web page:

http://www.hpa.org.uk/web/HPAweb&HPAwebStandard/HPAweb_C/1254510678961

CCG CODE

CCG NAME

CDI COUNT

Data Filter

All reported *C. difficile* infections in people aged 2 and over, as reported by PHE.

Calculation

None required, as the indicator is a single count.

Reporting Type

Count.

Rounding

The count is not rounded before publication.

Geographical Coverage

England.

Level of Reporting

Indicator is calculated for each CCG.

Output

Column Name	Output
Month	Month
CCG Code	CCG Code
CCG Name	CCG Name
CDI Count	The number of reported <i>C. difficile</i> infections
